

Asset Tracking, Future Planning, & Reducing Cost

Our goal is to eliminate routine tasks that will allow you to focus your energy on things that really matter! Eliminate the need to manually track network inventory, keep up with which computers need AV, determine how much memory you will require next year, identify aged equipment, as well as effectively manage your patches. We have the ability to reveal your network printer consumption levels, energy consumption details, as well as the age of your existing software and hardware in a matter of minutes vs. hours. We have designed this service to assist you in future growth and financial planning. It will allow you to reduce your operating costs, by determining areas where consumption or energy savings opportunities exist. We will partner with you to evaluate your infrastructure and collaborate on ways to stream line workflow to increase your revenue by reducing the cost associated with internal processes.

What makes us different...

- ◆ Our team has a combined experience level of over 20 years of IT Service Experience!
- ◆ Our passion, integrity, and skills are evident in ALL of our business dealings because we live IT!
- ◆ We value relationships!

Tips to reduce cost...

- ◆ Shut down workstations when you leave. (Average Annual savings \$40/year/pc)
- ◆ Don't leave printer paper by the printer.
- ◆ Recycle your aged equipment.
- ◆ Future Planning allows you to take advantage of better pricing opportunities!
